Kyiv, Ukraine

Experience

DevOps

2021

- Knowledge of DevOps principles and philosophy
- Organization of continuous integration and code delivery processes
- Working with cloud services
- Working with computer networks, knowledge of Cisco Packet Tracer, Exterior Gateway Protocol (EGP), BGP. Interior Gateway Protocol (IGP), RIPv2
- Stability and security of wired and wireless networks
- Working with modern software development methods
- I am proficient in the IaC approach, using Packer and Terraform for this purpose.
- Can write Ansible playbook to automate deployment and routine tasks.
- Packed sites into Docker for future upgrades by setting up a CI/CD pipeline, using Jenkins to continuously deliver updates to the web application.
- My research experiences have been positive ones due in part to my interpersonal skills. I work well in teams, am reliable and organized, and enthusiastic to lean. I am sure that I will carry over the same enthusiasm and skill in doing perfect job at your company.
- Learned from experienced teachers working at Google, Amazon, Facebook, Apple.
